

The people of New Jersey have made a strong statement regarding our right to privacy in our homes. The incessant telemarketing phone calls interfere with family meal time, quality family time and the peace of one's own home at the end of the day. We work all day - pay taxes on our hard days work and have a right to the sanctity of our homes. I am against any change in the New Jersey Do Not Disturb program. Forcing us to receive these unwanted and unsolicited phone calls in our private time is a violation of our rights.
